

How to improve constipation

10 global diet and lifestyle tips

Include foods rich in fiber:
5 portions of fruit and vegetables a day, including whole grains and legumes

Limit intake of refined sugar
(sweets and rich deserts)

Choose fruits rich in pectin, such as apples, strawberries, lychees or pears, to increase stool volume and ease passage

Regularize your eating time and food habits

Consume fermented dairy products, containing probiotics with proven benefits on constipation

Aim for a regular bowel action every second day

Drink 2 liters of drinking water a day while decreasing intake of caffeinated, alcoholic and sugar rich beverages

Practice a healthy lifestyle: exercise regularly and abstain from smoking

Reduce intake of foods high in animal fat, greasy and fried foods

Avoid stress: learn how to relax, improve sleeping patterns, exercise regularly, practice deep breathing and adopt good time management techniques
