

#WDHD2019

Early Diagnosis and Treatment of GI Cancer

Early Diagnosis and Treatment of GI Cancer

Seeking to:

- Promote multidisciplinary and personalized treatment of digestive cancers to achieve better clinical outcome
- Increase the awareness of the public on the benefit of screening and early detection of digestive cancers
- Provide gastroenterologists, hepatologists, their patients, and the lay public with an understanding of the latest basic and clinical research on the early detection, screening, and treatment of digestive cancers.
- Develop education and training materials on the key risk factors of digestive cancers
- Translate research into clinical practice to inform physicians, pharmacists, allied health professionals, healthcare payers, and the public of the risk factors, causes, and treatment of digestive cancers.
- Stimulate international collaborations that foster improved digestive cancer education, research, and training especially in the developing world
- Increase awareness of digestive cancers by providing a better understanding and recognition of the GI cancers as a global burden.

Partner with WGO and Plan Your WDHD 2019 Event Today!
